ITK Engineering, founded in 1994 in Germany, is an internationally operating technology company in the software and systems engineering field. Thanks to its strong methodological expertise, ITK covers the entire spectrum – from embedded systems to cloud computing. The company offers tailor-made consultancy and development services to international customers from the automotive, rail technology, medical technology, industry, motorsport, and robotics sectors. Since 2011 ITK Engineering has been active in Japan and has become a top engineering partner, especially in the automotive field. ITK Engineering has been a wholly owned subsidiary of Robert Bosch GmbH since 2017.

JOB DESCRIPTION

- Analyze and develop procedures for management and technical duties
- Define project responsibilities with stakeholders
- Maintain project time frames, budget estimates and status reports
- Work with clients to clarify requirements, and convey them to engineering teams
- Determine and define clear deliverables, roles and responsibilities for stakeholders required for specific projects or initiatives
- Provide leadership and management for sales development activities, in alignment with the strategic company direction

QUALIFICATION

- Bachelor's degree in engineering or a related discipline
- Experience in automotive system development
- Ability to make decisions and evaluations to determine the needs of the customers
- Strong sense of personal accountability regarding decision-making and supervising department teams
- Experience working in a high-level collaborative environment and promoting a teamwork mentality
- Excellent oral and written communication skills in both technical and business terms
- Strong communication skills to coordinate with team members, vendors and management
- Japanese and English proficiency

WORKING ENVIRONMENT

- Global collaboration, especially with colleagues from Germany
- Corporate culture that enables a balanced work-life ratio
- Flexible hours and remote work
